As a Software Development Engineer

Dear Sir or Madam,

With a strong technical foundation, a proactive mindset, and a collaborative approach, I am confident in my ability to contribute to the success of your team.

Throughout my career, I have honed my skills in Java and Object-Oriented Programming (OOP) concepts, excelling in frameworks like Behavior-Driven Development (BDD) and Test-Driven Development (TDD) based on the Page Object Model (POM) design. My extensive experience includes building, scripting, and executing automated tests using cutting-edge tools such as Selenium WebDriver, Playwright, TestNG, JUnit, Cucumber with Gherkin, Maven for front-end testing, as well as leveraging REST Assured API for back-end validation.

Beyond my technical expertise, I am adept at designing comprehensive testing strategies, performing Functional, Smoke, Regression, Integration, and End-to-End (E2E) Testing, ensuring robust and scalable solutions. My proactive approach to problem-solving allows me to identify issues early and implement practical, effective solutions efficiently.

What sets me apart is my ability to work seamlessly within diverse teams. As a strong team player with excellent communication skills, I value collaboration and adaptability, which help foster productive relationships with colleagues and stakeholders. I take pride in my ability to simplify complex issues, ensuring alignment and shared understanding across all levels of a project.

I am eager to bring my technical acumen and interpersonal strengths to contribute meaningfully to your team's goals.I would welcome the opportunity to discuss how my skills and experiences align with the needs of your organization.

Thank you for considering my application.

With kind regards

MUAMMER ONER

SKILLS

Test
- Selenium
- Cucumber
- Playwright
- JUnit
- TestNG
- Appium
- Robot
- Cypress

Backend
- Java
- C#
- Python
- Typescrit
- SQL
- Spring Boot
- Restful Api

Tools
- Git/Github
- Jira, Xray
- Jira Confluence
- Jenkins
- Postman
- Hoppscotch
- CI/CD
- JMeter

Frontend
- Html
- Css
- Java Script
- React
- Angular
- Bootstrap

German (Fluent)

English (Fluent)

SUMMARY

I am an experienced Tester with comprehensive knowledge of **SDLC**, **STLC**, and Defect Life Cycle processes. Skilled in collaborating with cross-functional teams, including Developers, and Product Owners, within **Agile**/**Scrum** environments to ensure high-quality deliverables. Proficient in **Java**, **CI/CD** tools, and test automation frameworks, I excel in developing and executing test cases, implementing test plans, and tracking bugs to meet client expectations.

I am adept at using tools like **Selenium** WebDriver, **Playwright**, **TestNG**, **Cucumber**, and **REST Assured** for both front-end and back-end testing. My experience spans Functional, Smoke, Regression, Integration, and End-to-End testing, coupled with a strong grasp of Object-Oriented Programming (**OOP**) concepts and Scrum practices. I am a proactive and versatile team player, committed to ensuring software reliability and performance in dynamic and challenging environments.

WORK EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEER
Junius Tech — 2024 July - Present

- Worked with multiple customers and software projects, promoted to Team Lead.
- Responsible for manual/automated tester team(s).
- Mentoring new team members and Knowledge Transfer activities at the time of onboarding.
- Developed **Test Strategy** and **Test Plan** to fulfill all **Test Cases** for functional performance and usability.
- Maintained clear documentation and collaborated with team members using ERPNext's integrated tools.
- Managed development priorities and workflow, ensuring the timely delivery of automation projects.
- Focused on increasing test automation coverage by ensuring proper tool and framework setup for an optimized testing environment.
- Automated multiple API services and presented their custom-generated reports.
- Involved preparing daily, weekly, and monthly test status reports.
- Improved CI/CD processes using **Jenkins**, enhancing project workflows and achieving better results.
- Used Git as Version Control tool and **GitHub** as a remote repository for tracking projects.
- Performed manual API testing using tools like **Postman** and **Hoppscotch**, and conducted UI testing with **TypeScript** using **Playwright**, as well as with **Java** using **Selenium** and **Cucumber**.

SOFTWARE DEVELOPMENT ENGINEER
Futuristic Tech Consult Company Scholar Stations Project — 2023 May - 2024 July

- Performed Manual testing for companies and educational institutes websites.
- Supported software delivery teams for the full cycle software development projects.
- Developed Test Cases based on functional specifications.
- Analyzed the System Requirements, developed detailed **Test Cases** and provided the documentation.
- Performed various type of testing including **smoke testing**, **regression testing**, **functional testing**, and **API testing**.
- Designed, developed and implemented Page Object Model (**POM**) based on Automation-Testing Framework utilizing **Java**, **Selenium** WebDriver, **Cucumber** (Gherkin), Maven.

SOFTWARE DEVELOPMENT ENGINEER
Wise Quarter Bootcamp — 2022 Apr - 2023 May

- Completed training on **SDLC**, **STLC**, and both automation and manual testing techniques.
- Gained hands-on experience with real projects using **Agile** methodology, covering **UI**, **API**, **Database**, and **Mobile testing**.
- Worked with tools like **Selenium**, **Cucumber**, **TestNG, JUnit**, **Appium**, **Git**, **Postman**, **Jira**, and **Jenkins**.

Career change — 2019 Dec - 2022 Apr

- Relocated to a new country and currently pursuing a career transition into the software development field, focusing on building skills and exploring opportunities in this dynamic sector.

LAWYER
Ankara Bar Association — 2017 May - 2019 Dec

INSTRUCTOR
Turkish Air Forces — 2014 Apr - 2017 May
